DEMOAPP TEST REPORT

1. TEST IDENTIFICATION, DURATION

The demo App is a simple login page. A readme file was provided which includes the installation process and the requirements.

A. PARTICIPANTS

i. AYOMIDE AFOLABI
B. DURATION – 72 hours in total

2. TEST ENVIRONMENT

Browser – UI Test

Postman and Python(unittest) – API Test

3. TEST OBJECTIVE

 users/API consumers should be able to register and review their profile verification that actions and data are available to those users with correct credentials.

4. TEST DEFECTS/ERRORS

A. UI Test

Users are able to register with an already used phone number. phone number should be unique, no two users should have the same phone number.

B. Python Test (unittest)

GET   /api/users , Authentication isn't working: is expected to require authentication (token) for requests. However, it was noticed that the request sends successfully without token
